

EXEL[®]

SMPS CHARGER

These are SMPS based chargers having wide input range and low weight. The output rating of the charger is 14 V/ 10 A DC. This charger is suitable for charging of any type of batteries. These chargers are portable due to light weight and can be carried in field to charge the Deep Discharged batteries. These chargers are also used with generators for charging of batteries. These chargers can also be connected in parallel with Inverter for fast charging of batteries.
